Advisors Verification Form
Interdisciplinary paper

As part of their non-course requirements, all Cognitive Science graduate students must complete an interdisciplinary paper by the end of their 8th semester. It is up to the student’s primary and secondary advisors to assess if the paper meets this interdisciplinary requirement (see cogsci.tufts.edu/academics/requirements.htm for details).

This form should be signed by both advisors and returned to Gina Kuperberg, Director of Operations for the Cognitive Science Graduate Program, at 490 Boston Ave, Medford, MA 02155. Alternatively it can be scanned in and emailed to Gina Kuperberg. A copy of the interdisciplinary paper should also be e-mailed to Gina Kuperberg for her records at kuperber@nmr.mgh.harvard.edu.

I assessed and provided feedback to my advisee, __________________________ for their interdisciplinary Cognitive Science paper
____________________________________________________________________________.

I verify that this paper speaks to at least two sub-disciplines/fields within Cognitive Science. In my opinion, it meets the requirement for the interdisciplinary written qualification for the Cognitive Science Graduate program.

Primary advisor’s name (printed): __________________________ Date: __________

Primary advisor’s signature: ___________________________________________

Secondary advisor’s name (printed): __________________________ Date: __________

Secondary advisor’s signature: ___________________________________________

Student’s signature: __________________________ Date: __________
